

Meet Tom and Lucy, twin leopard cubs (or are baby leopards called kittens?) born recently at the Cincinnati Zoo. The call of the wild is inborn in the frisky little critters, and they soon learn that claws and teeth were made to use and human flesh is a good stamping ground.

Some more cubs, Tom, Dick and Harry—a basketful of lion triplets, who first saw daylight in our own Central Park menagerie—and a great source of amusing interest to the hundreds of daily visitors. They're friendly enough at this stage of their careers, but—

Left—"Honorably Discharged," an interesting bit of sculpture by Mrs. Harry Payne Whitney, which will be one of the exhibits at the Independent Artists Annual Exhibition, which opens at the Waldorf next Thursday.

## MISTAKES WOMEN MAKE IN THE CARE OF THEIR COMPLEXIONS

Much homeliness is caused by three common little mistakes

**F**IRST, many women who appreciate the importance of powdering fail to understand the right way to do it. Again and again during the day, on the street, in the shops—everywhere—they are powdering, in a frantic effort to overcome a shiny face.

Yet the ugly glisten keeps cropping out.

This is because people make the mistake of applying the powder *directly* to the skin.

If powdering is to be at all lasting the thing to do is always to apply a powder

base. Before you powder take just a little Pond's Vanishing Cream on the tips of your fingers. Rub it well into your face. Instantly it disappears, leaving your skin softened and refreshed. Now powder, and don't think of it again.

Pond's Vanishing Cream has no oil, so it cannot come out in a shine. More than this, it holds the powder fast to your face two or three times as long as ever before.

Dermatologists say that such a powder base is a *protection* to the skin. It keeps its texture from the coarsening due to exposure.

Wind and dust ruin your looks

A day in the wind, sun and dust plays havoc with your complexion. It chaps it; it dries it; it blows away the powder. Before going out protect your face and hands with Pond's Vanishing Cream. For years it has been famous for overcoming chapping and roughness. Without making your skin shiny, it will keep it soft, and prevent the dust and powder from working into the pores. Applied over this protecting cream, the powder stays on two or three times as long as it ever did before.

You will find, too, that you can give yourself a wonderful massage with Pond's Cold Cream. It has just the consistency that is perfect for working well into the skin.

Every skin needs two creams

The creams that your skin needs are each very different from the other.

It is Pond's Vanishing Cream that you should use as a powder base, as a protection from cold and dust, and to freshen the complexion. Pond's Vanishing Cream is without oil. It is based on an ingredient which physicians have recommended for years for its softening, beautifying properties.

On the other hand, for cleansing, for supplying a lack of oil, and for massage, Pond's Cold Cream should be used. Its formula was especially worked out to supply just the amount of oil required for these uses.

Neither of these creams will encourage the growth of hair on the face.

Get a jar or tube of each cream to-day at any drug or department store.

Subtract a few years from your age

When you are feeling all tired out, yet have to look your best, rub a little Pond's Vanishing Cream into your face and neck. At once the drawn feeling around your mouth and eyes goes. Your skin takes on a fresh, transparent look. This cream disappears instantly and will not reappear in a shine.

The dust will shock you

You have no idea how much dust can work into the pores of your skin until you see how much comes out in the first Pond's Cold Cream Cleansing. Your skin needs this wonderful oil cream cleansing at night.

## POND'S Cold Cream & Vanishing Cream

One with an oil base and one without any oil
